

The innerHTML property sets or returns the HTML content (inner HTML) of an element.

Return Value: A String, representing the HTML content of an element

Example

Get the HTML content of a <p> element with id="myP":

```
<!DOCTYPE html>
<html>
<body>

<p id="myP">I am a paragraph.</p>

<p>Click the button get the HTML content of the p element.</p>

<button onclick="myFunction()">Try it</button>

<p id="demo"></p>

<script>
function myFunction() {
    var x = document.getElementById("myP").innerHTML;
    document.getElementById("demo").innerHTML = x;
}
</script>

</body>
</html>
```
