# Asset Management Overview module

London

[Subscribe](#)

The Asset Management Overview module displays widgets showing information such as configuration item by manufacturer, computers by manufacturer, configuration item types, and asset information for a specific vendor. It also includes a report widget showing pending asset retirements for the current week, month, and year.

The Overview module is a dashboard.

## Roles

Only users with certain roles have access to the Overview module. Users with these roles can view the overview page and refresh, add, delete, and rearrange widgets.

- admin
- asset
- sam

## Use the Asset Management Overview module

The Asset Management Overview module displays various asset management widgets.

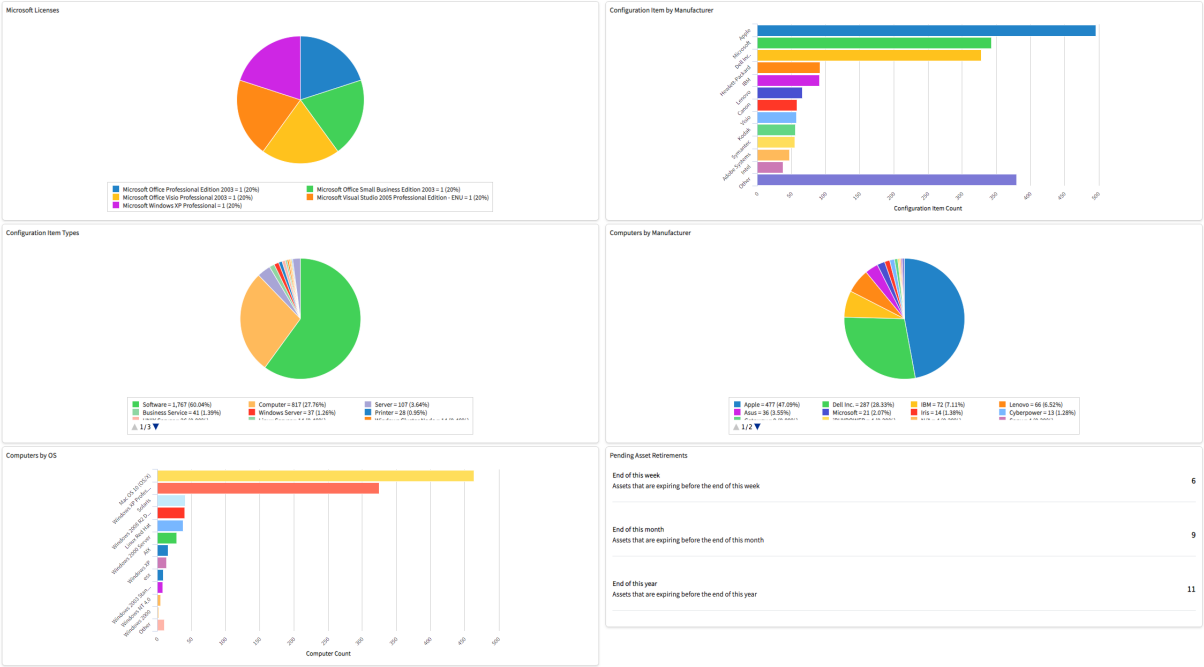

### Before you begin

Role required: asset, sam, or admin

### Procedure

1. Navigate to **Asset > Overview**.
2. Click elements within reports to obtain more information.

Asset Management Overview module
